

Final leg of climate change governance trainings conducted in Homabay County

Trainees from county governments of Homabay and Kisumu and Community members have, in the months of April and May, been involved in intense trainings on the county budget cycle and climate change governance by Transparency International on behalf of the DaCCA programme.

The first training which was organized for CSOs and community members was conducted between the 23rd and 24th of April, 2019 in Kisumu County and this was on the county budget cycle.

Subsequently, a three day training was organized for the county officials in the month of May and this tackled climate change governance and the budget cycle.

Finalizing these series of trainings, was the CSOs and community members training on

climate change governance issues and this was conducted at a Homabay hotel. The DaCCA programme seeks to have an **increasingly qualified CSO's sector which works closely with the most vulnerable groups (right-holders) and duty-bearers on climate change adaptation interventions.** Thus, the trainings were conducted with an objective of meeting this vision.
